

## Postdoc position available in zebrafish (September 1st, 2010 or before)

The Institute of Research in Ophthalmology (IRO) is looking for a talented young PhD to join our zebrafish program. In this position, he/she will be responsible to dissect the molecular mechanisms implicated in the development of the eye and, using the zebrafish as a model organism, to investigate the role of the genes identified in human patients by our linkage & mapping group. This program is financed for a period of three years.

The candidate should have a good experience with zebrafish and developmental studies. Strong ties with other zebrafish groups are an advantage.

IRO, a research institute affiliated to the EPFL and the University of Lausanne, is located in Sion, in the centre of the Swiss Alps, at about 100 km from Lausanne. You can access our web page for further information and description of our research activities (<http://www.irovision.ch>).

Send letter of application and CV by e-mail to [Daniel.Schorderet@irovision.ch](mailto:Daniel.Schorderet@irovision.ch)
